

Fluoropolymer Reaction Loop

Maximizes mixing and reaction efficiency

Fluoropolymer Mixing Block

- Low dead volume
- Secure threaded connections
- Efficient reagent mixing

Small Footprint

- Smallest hydride generator on the market
- Easy, fast installation

MP² Micro-peristaltic Pump

- Low pulsation for consistent sample mixing
- Minimizes analytical noise from gasses formed during reaction

Easy Connection to Spray Chamber

- Universal nebulizer adapter inserts into any standard spray chamber
- Optional cyclonic spray chamber with threaded hydride inlet port

High-efficiency Gas Liquid Separator (GLS)

- Low volume
- Frosted to promote fast reaction rate
- Excellent washout
