

## TRAXOil

Automated sample handling and preparation in one system

### Automate The Entire Sample Workflow

- Robotic sample handling from start to finish
- Uncap, heat, pour, recap, and prepare every sample automatically
- Load capped samples, start your method and walk away

### Automate the Routine. Maximize Your Team.

- Automate repetitive tasks, freeing team members for higher-value work
- Keep your team focused on lab safety, workflow management, and delivering quality quickly

### Track Every Sample. Trust Every Result.

- Barcode reading tracks samples from loading to final preparation
- Seamlessly exports sample data to LIMS and analytical software

### Powerful Automation. Simple Operation.

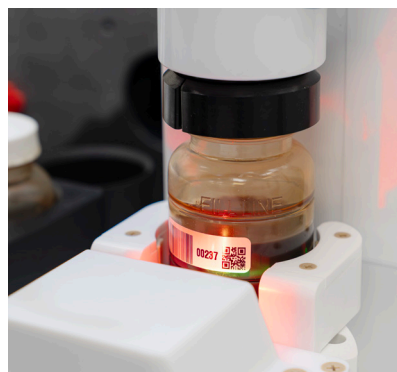

- Intuitive touchscreen control for the lab operator
- Save, recall, and run proven workflows in seconds
- Reduce complexity and drive consistent performance across shifts, operators, and labs

in Action

#### TRAXLink

Automated uncapping and  
barcode reading module

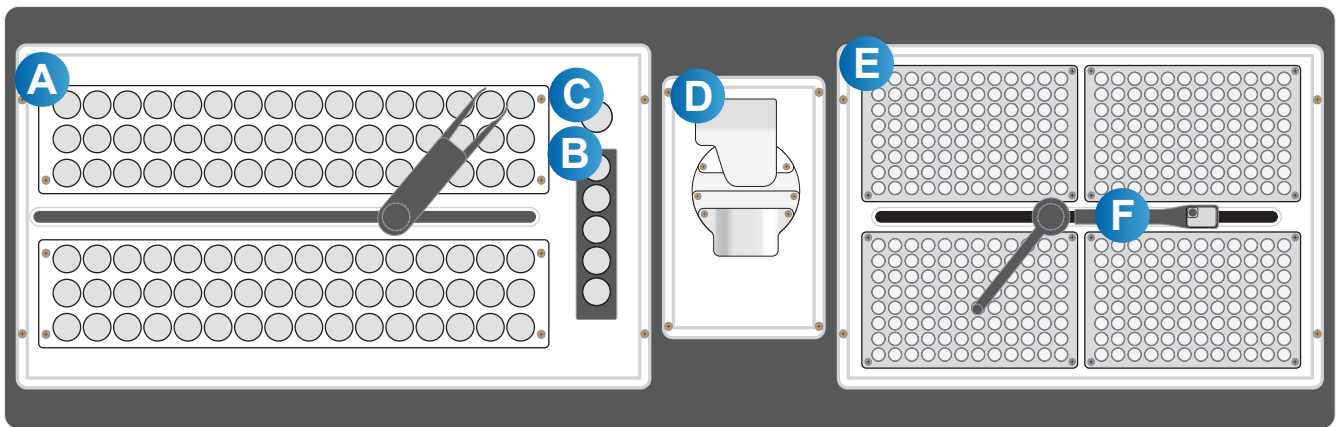

# How TRAXOil Works

## Workflow Diagram

One Integrated Workflow. Less Handling. More Control.

- A)** Loaded source samples
- B)** Sample conditioning
- C)** Vortex mixing
- D)** Sample identification, adaptive uncapping, and liquid-level verification
- E)** Prepared aliquots for downstream analysis
- F)** Precision dilution and rinse control
